David M. Farnum, founding partner of ATFirm PLLC, and previously Albrecht Tousi & Farnum PLLC, is a leading national intellectual property litigator with focus on patented high technologies and science, trademarks, trade secrets, copyrights, false advertising, licensing, and unfair competition. In this capacity, Mr. Farnum has litigated dozens of patent suits before numerous United States District Courts, the United States Court of Appeals for the Federal Circuit and the International Trade Commission. Mr. Farnum was previously a partner with Venable LLP and in private practice with Latham & Watkins and Cleary Gottlieb.

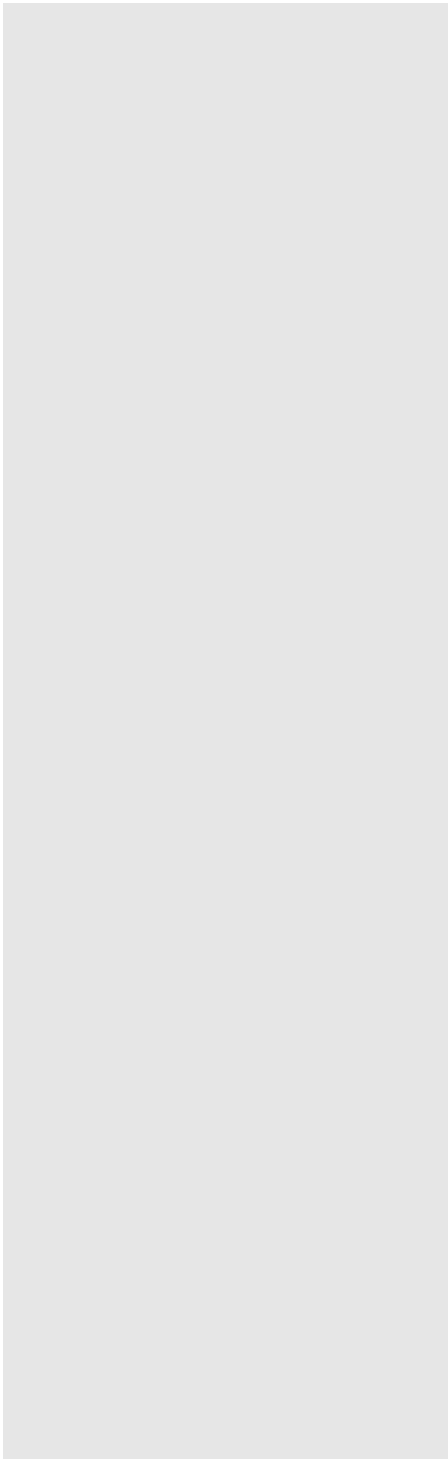

Mr. Farnum has been lead counsel for both plaintiffs and defendants in suits involving a variety of technologies for US and foreign companies, often coordinating with counsel in Germany, France, Japan, Taiwan and Canada. In the high technology area, he has represented clients in such industries as electronics, telecommunications products and services, Internet technologies, software, computer hardware, financial services, semiconductors and optical systems and components. He has also represented clients in the sciences industries, including biotechnology, medical devices and pharmaceuticals (including Hatch-Waxman litigation).

Mr. Farnum is also experienced in the licensing and transactional components of complex technologies, often involving multimillion dollar settlements without need of litigation. Where amicable resolution is not reached, he is recognized by peers and clients alike as a visionary in pretrial strategies and for his creativeness in the tactics to implement these strategies.

In patent cases, Mr. Farnum frequently obtains findings of invalidity and non-infringement as a matter of law, resulting in efficient case resolutions without the need for a trial. Where trial has been necessary, Mr. Farnum has successfully enforced and defended client rights. His negotiation experience is often critical to garnering the most favorable settlement terms for firm clients.

## REPRESENTATIVE INTELLECTUAL PROPERTY LITIGATIONS
